

THE 30-DAY READ · TO 3 JULY 2026

Europe's deal machine, decoded.

Eighty-three M&A, buyout and exit situations across EMEA in thirty days. Where the capital moved, which sectors ran hot, and the mandates forming behind the headlines. Read live from StrategyAI's signal engine.

83

DEALS TRACKED

\$88.8b

DISCLOSED VALUE

16

COUNTRIES

23PE-LED & TAKE-PRIVATE

Thirty days, in numbers

83

SITUATIONS TRACKED

Verified M&A, buyouts, carve-outs, take-privates and exits across EMEA.

\$88.8b

DISCLOSED VALUE

Across the 39 deals with a public figure. Many more undisclosed.

16

PE-LED DEALS

Plus a wave of sponsor exits and secondary buyouts.

14

CARVE-OUTS

Corporates shedding units at pace: VW, thyssenkrupp, Saint-Gobain, Evonik.

7

TAKE-PRIVATEs

Listed companies pulled off-market by sponsors and strategics.

16

COUNTRIES

Germany, the UK and the Nordics the busiest, Italy carrying the value.

◆ THE STRATEGYAI READ

This is not a quiet market. In a single month our engine surfaced eighty-three genuine mandates worth close to ninety billion dollars in disclosed value alone, led by the return of European bank consolidation and a relentless run of carve-outs and take-privates. The headline is not deal count, it is **structure**: corporates are simplifying, sponsors are recycling capital between each other, and global buyers are shopping in Europe.

Industrials and TMT run the volume, banking carries the value

■ DEAL COUNT BY SECTOR, 30 DAYS

◆ WHAT WE'RE SEEING

Industrials and TMT are the workhorses at sixteen deals each, dominated by carve-outs (Everllence, Kontron, Flender, tk accelis) and software consolidation (Schneider buying Cognite, Sixth Street backing Kpler). **Financial services carries the value** at thirty-four billion, almost entirely Intesa Sanpaolo's move on Monte dei Paschi. The pattern beneath the bars: complex, multi-workstream situations where the operating decisions happen in the first hundred days, not niche add-ons.

The German-UK-Nordic engine

■ DEALS BY COUNTRY

■ DEAL STRUCTURE

■ WHO IS BUYING

◆ WHAT WE'RE SEEING

Germany, the UK and the Nordics generate over two-thirds of activity. Germany is the carve-out capital (VW, thyssenkrupp, Evonik all shedding assets), the UK is where take-privates cluster (Tate & Lyle, Hyve, AMS), and the Nordics are consolidating hard (Norwegian buying Ving, Fortum buying Elmera, Telenor rolling up fibre). Strategics still lead by count, but the fourteen carve-outs and seven take-privates are where the richest advisory mandates sit.

Capital is recycling, not sitting still

Private equity was behind **sixteen deals directly**, but its fingerprints are on far more. The defining sponsor move of the month was **the secondary buyout**: assets passing from one fund to the next rather than to a strategic or the public market.

SECONDARY BUYOUTS

Triton bought **Flender** from Carlyle. CVC bought **Irca** from Advent. Hellman & Friedman bought **Hyve** from Providence. Arcline bought **Avantus Aerospace** from Inflexion. Sponsor-to-sponsor is the exit route of choice.

TAKE-PRIVATES

Ingredion for **Tate & Lyle**. Mubadala for **Pierre & Vacances**. Norvestor for **Zalaris**. A Riesling consortium for **Viva Wine**. Dai Nippon for **AUSTRIACARD**. Public markets are a source, not a destination.

BIG-TICKET SPONSORS

Bain took a majority of Everllence from Volkswagen at 7.4bn euros. **EQT** moved on Yorkshire Water's parent. **Sixth Street** put over a billion into Kpler. Scale capital is chasing platforms, not just add-ons.

SOVEREIGN & GLOBAL

Masdar into Repsol's renewables. **Mubadala** into French leisure. **Foxconn** on Kontron, **Dai Nippon** on **AUSTRIACARD**. Gulf and Asian capital is buying European operating assets directly.

◆ WHY IT MATTERS

A recycling market is a **mandate-rich market**. Every secondary buyout resets a value-creation plan. Every carve-out needs a standalone operating model. Every take-private opens a hundred-day agenda the day it delists. This is where advisory demand concentrates, and it is forming now, weeks before most of these deals close.

The situations we are watching

Intesa Sanpaolo → Monte dei Paschi

\$33.0b

FIG • ITALY • ACQUISITION

DEAL OF THE MONTH

THE READ: European bank consolidation is back. A 30.6bn euro combination folding MPS and its Mediobanca unit into Intesa, with a 635-branch divestment remedy. Integration architecture and branch carve-out run in parallel from day one.

Bain Capital → Everllence (ex-MAN Energy)

\$8.0b

INDUSTRIALS • GERMANY • CARVE-OUT FROM VOLKSWAGEN

THE READ: The month's largest carve-out. A full standalone stand-up of a major engineering group, with VW retaining 49 percent. Operating model, transition-service exit and a fresh value-creation plan all commissioned early.

Ingredion → Tate & Lyle

\$4.9b

CONSUMER • UNITED KINGDOM • TAKE-PRIVATE

THE READ: A recommended cash offer ending an 87-year London listing. Two ingredients platforms combine, opening integration and synergy planning across a long path to completion.

RWE → Amprion (via M31)

\$3.9b

ENERGY & INFRA • GERMANY • STAKE TO MAJORITY

THE READ: RWE takes majority control of a national transmission grid, backed by QIA and Norges. Governance and operating-model work alongside a linked equity raise.

thyssenkrupp → tk accelis spin-off

\$3.9b

INDUSTRIALS • GERMANY • SPIN-OFF / LISTING

THE READ: The materials-trading arm listed to Frankfurt. Standalone set-up and equity-story readiness through 2026 as the group simplifies.

Aedifica → Cofinimmo

\$3.35b

REAL ESTATE • BELGIUM • ALL-SHARE MERGER

THE READ: Two listed healthcare REITs combine, with a mandated 300m euro disposal programme. Portfolio integration and remedy execution run together.

Schneider Electric → Cognite

\$3.1b

TMT • NORWAY • ACQUISITION (AKER EXIT)

THE READ: Industrial-AI software folded into AVEVA. Product rationalisation and commercial synergy planning in the first two quarters.

CVC Capital Partners → Irea

\$2.75b

CONSUMER • ITALY • SECONDARY BUYOUT FROM ADVENT

THE READ: A classic sponsor-to-sponsor recycle. New value-creation and buy-and-build agenda for a bakery-ingredients platform under fresh CVC ownership.

Holcim → Xella International

\$2.05b

INDUSTRIALS • GERMANY • ACQUISITION (LONE STAR EXIT)

THE READ: Completed inside the window. Plant-network rationalisation and synergy capture set the value case immediately.

Korn Ferry → AMS (Alexander Mann)

\$1.1b

BUSINESS SERVICES • UNITED KINGDOM • SPONSOR EXIT (OMERS)

THE READ: A large RPO and MSP platform changes hands. Delivery-model alignment and cross-sell decide whether the case lands.

EQT → Kelda / Yorkshire Water

Undisclosed

ENERGY & INFRA • UNITED KINGDOM • INFRASTRUCTURE STAKE

THE READ: Core infrastructure capital into a regulated UK water utility. Operating model, capital programme and regulatory strategy under new ownership.

The takeaways

01 · BANK CONSOLIDATION IS THE NEW HEADLINE

Intesa on MPS reopens European FIG consolidation at scale. Watch the Addiko Bank contest (NLB versus Raiffeisen) as the next domino.

02 · IT IS A CARVE-OUT AND TAKE-PRIVATE MARKET

Corporates are simplifying and public markets are a hunting ground. Fourteen carve-outs and seven take-privates in a month is a structural signal, not noise.

03 · SPONSORS ARE TRADING WITH EACH OTHER

Secondary buyouts dominate the exit route. Capital is moving, and every hand-off resets a value-creation clock.

04 · EUROPE IS ON SALE TO GLOBAL CAPITAL

US, Gulf and Asian buyers are acquiring European operating assets directly. Cross-border integration is the mandate that follows.

POWERED BY STRATEGYAI

The mandate shows up in the signal, weeks before the headline.

StrategyAI reads the live EMEA signal flow, scores every deal, restructuring and exit as it forms, and turns it into partner-ready intelligence with the angle, the evidence and the people to call. This report is one month of that engine, read straight from the platform.

strategyai.co.uk/deal-insights

How this was built

Window. The thirty days to 3 July 2026. **Scope.** Genuine M&A, buyouts, carve-outs, take-privates, mergers, minority and growth investments, and exits across Europe, the Middle East and Africa. Equity and debt capital-markets issuance is tracked separately and excluded here to keep the read on control transactions.

Data. Eighty-three situations curated and verified against public sources by StrategyAI's intelligence engine. Values are disclosed enterprise or equity values in US dollars where public; thirty-nine of the eighty-three carry a disclosed figure, so the 88.8bn dollar total is a floor, not a ceiling. Every deal is source-linked and scored for mandate strength.

What we do not do. We do not blur what is confirmed with what is forming, and we do not publish a company on a single unverified source. Where a figure could not be stood up, it is left out.

StrategyAI is an EMEA deal-intelligence platform. It reads thousands of public signals a day, scores the mandates forming behind them, and delivers them to advisory and investing teams with the evidence and warm paths to act. This document is a market read, not investment advice, and names only publicly reported transactions.
